

VAIBHAV SONI

Senior Product Manager — MarTech & Data Infrastructure

 vaibhavgear7@gmail.com |  +91-9111557470 |  [linkedin.com/in/vaibhavsoni02](https://www.linkedin.com/in/vaibhavsoni02) |  India (Open to Hybrid)

PROFESSIONAL SUMMARY

Senior Product Manager with 5+ years owning the full MarTech and data infrastructure stack — from SDK instrumentation and event schema design to ad-platform integrations and real-time data pipelines. Hands-on implementer of Rudderstack and Segment CDPs, GTM governance across web and native mobile (iOS/Android) apps, and server-side event tracking via Meta CAPI, Google Enhanced Conversions, and Snapchat CAPI. Deep experience with attribution platforms (Adjust, Appsflyer, Branch, Singular) and engagement tooling across the full lifecycle. Experienced in managing cross-functional engineering pods and aligning global stakeholders across India, US, AUS and APAC time zones.

CORE COMPETENCIES

CDP / Pipelines	Rudderstack, Segment — full end-to-end implementation (web SDK, iOS/Android native SDK, server-side, cloud mode, device mode, cross-platform)
Tag Management	Google Tag Manager — container governance, trigger/tag architecture, multi-team GTM, latency optimization, data leakage prevention
Ad Platform APIs	Meta CAPI, Snapchat CAPI, Google Enhanced Conversions — server-side conversion tracking; Adjust, Appsflyer, Branch, Singular — attribution, deep linking, ad spend reconciliation
Mobile SDKs	iOS & Android native instrumentation, cross-platform (React Native), QA framework for event validation, mobile attribution setup
Event Governance	Data Contracts, JSON schema design, event taxonomy, tracking plan ownership, warehouse-ready schemas, end-to-end QA framework
MarTech Engagement	Klaviyo, MoEngage, Customer.io, CleverTap, Netcore, WebEngage — lifecycle and omnichannel automation
Analytics & BI	Mixpanel, Metabase, Power BI, Redash, Google Analytics 4 — funnel analysis, cohort, retention
Engineering	SQL, REST API, HTML/CSS, Python (scripting), basic JS — able to debug data pipelines independently
Operations	Jira, Confluence, Notion — sprint planning, bug triage, retrospectives, incident management

EXPERIENCE

Senior Product Manager | Optiblack

Apr 2025 – Present (1 yr 2 mos) · Remote — US & AUS Clients

- ▶ Serve as the primary MarTech implementation lead for clients across HealthTech, FinTech, ConsumerTech, eCommerce, SaaS, and WellnessTech verticals — owning end-to-end delivery from scoping to go-live.
- ▶ Architected and deployed complete Rudderstack and Segment CDP implementations — including web SDK, iOS/Android native SDK, server-side (cloud mode), and cross-platform event pipelines from scratch (0→1) for clients including Hummingbirds, Vama, FNP, Amala Earth, Zilo, Jatri, and others.
- ▶ Owned GTM governance across multiple client containers: structured trigger/tag hierarchies, enforced change-management protocols, and eliminated data leakage and site latency issues.
- ▶ Led server-side ad platform integrations end-to-end: Meta CAPI, Snapchat CAPI, and Google Enhanced Conversions — ensuring 100% conversion signal reliability and improving ROAS attribution accuracy.
- ▶ Managed full MMT stack: Adjust, Appsflyer, Branch, and Singular — covering attribution, deep linking, and ad spend reconciliation across mobile platforms.
- ▶ Designed and enforced Data Contracts and JSON event schemas to standardize tracking across frontend and backend touchpoints before data reaches the warehouse.
- ▶ Built the first integration testing framework for data capture QA — ensuring frontend feature changes (checkout, search, onboarding) did not break downstream event capture or catalog feeds.

- ▶ Managed mobile SDK instrumentation quality on iOS and Android; closed QA gaps and established mobile event validation checkpoints alongside engineering pods.
- ▶ Mentored a cross-functional pod of Full Stack Developers, Data Engineers, and Analysts; collaborated with a dedicated UX Designer on data product experiences.
- ▶ Building Hodor — an internal SaaS tool to simplify product analytics at scale for clients.

Product Manager | Optiblack

May 2024 – May 2025 (1 yr) · Remote

- ▶ Onboarded clients onto product analytics from zero — scoping data architecture, selecting tool stacks, and leading hands-on implementation of Mixpanel, MoEngage, Metabase, and CDP pipelines.
- ▶ Configured Mobile Measurement Tools (MMT): Adjust, Appsflyer, Branch, and Singular — covering attribution, deep linking, and ad spend reconciliation.
- ▶ Acted as the technical point of contact for vendors including Rudderstack, GTM, and engagement platforms — managing updates, versioning, and escalation.
- ▶ Drove data-led growth strategies for clients globally, translating raw pipeline data into actionable product and marketing decisions.

Associate Product Manager | LearnApp

May 2022 – May 2024 (2 yrs) · Noida, India

- ▶ Owned end-to-end product lifecycle for three major product launches: LearnApp Prime & Cohorts, Zero1 (India's first wealth festival with pass system + offline verification), and Varsity Live (Zerodha-backed EdTech arm) — each scaled to 2,000+ users.
- ▶ Instrumented Mixpanel event tracking across web and mobile; managed GTM and Facebook Pixel for funnel and attribution analytics.
- ▶ Built and maintained CRM automations (Leadsquared, HubSpot, Intercom) and omnichannel engagement flows (MoEngage, Wati) for marketing and sales lifecycle.
- ▶ Drove product experiments that measurably improved user retention; designed UX flows with the design team using Figma and Miro.
- ▶ Led sprint planning and engineering coordination using Jira and Trello; authored product documentation in Notion and Confluence; managed GTM strategy and SOPs.

Associate | Testbook.com

Jul 2020 – May 2022 (1 yr 11 mos) · Mumbai, India

- ▶ Optimized UX and logic for engagement activities (live tests, quizzes, recommendations) — drove 73% uplift in user engagement and 87% MAU growth over 6 months.
- ▶ Contributed to multiple test interfaces supporting Railways, Banking, and SSC examinations — helped grow daily test attempts from 300K to ~900K (3×).
- ▶ Improved LMS (content management system) flows for the Assessment vertical; analyzed content performance using Redash and drew insights for quality improvement.
- ▶ Managed freelancer workflows, timeline scheduling, process optimization, and data reporting.

EDUCATION

Bachelor of Engineering (Mechanical) · Rajiv Gandhi Prodyogiki Vishwavidyalaya, Sagar · 2014–2018 · CGPA: 7.03
